EDUCATION

Bachelor of Computer Science and Business Administration Double Degree

Expected May 2027

University of Waterloo & Wilfrid Laurier University

- **Relevant Courses:** Object-Oriented Programming (C++), Elementary Algorithm Design, Computer Designs & Organization
- **Certification:** Microsoft Azure Artificial Intelligence Fundamentals

SKILLS

Languages	C++, C, Java, Groovy, Python, SQL, JavaScript, HTML, CSS (Stylus, Tailwind), Bash, Powershell
Libraries/Frameworks	React, React-three-fiber, Three.js, Framer-Motion, Vue.js, Node.js, Mockito, Pygame
Tools/Platforms	Git, Jenkins, Jira, Linux, AWS, Azure, SQL Server Management Studio, Power BI

EXPERIENCE

Software Developer

January - April 2024

Trend Micro

Ottawa, ON

- Developed a caching mechanism for the **Application Control** product to enforce security rules on specified users using **C++**.
- Facilitated cross-team collaboration to detect & generate new security events on **Workload Security's** GUI using **Java**.
- Enhanced builds' quality by automating Jenkins regression tests for all new builds & integrated results as a GitHub status check.
- Enabled developers to automate builds' performance results by maintaining Python test scripts & deploying AWS resources.

Web Developer

July 2023 - Present

Vision Capital Corporation

Toronto, ON

- Enhanced policy transparency by implementing cookie policies for Vision Capital, an investment fund managing **\$159+ million**.
- Reduced invalid investor access to private funds by **80%** by developing **Vue.js** certification pages for qualified purchasers.
- Improved marketing team efficiency by integrating the **Prismic API**, enabling website layout modifications without code.
- Migrated websited deployment from **AWS** to **Netlify** & configured the appropriate Node.js version for future local development.

Microsoft - Finance Project: Financial Investment Coach

June - August 2023

Waterloo Experience Accelerate Program - Microsoft Azure & AI Fundamentals

Waterloo, ON

- Improved financial decision-making skills of young adults by developing and pitching a financial investment coach using **Microsoft Azure Machine Learning** and **Microsoft Azure Bot Services**.
- Optimized data preprocessing by leveraging **Azure ML modules**, including **Normalized Data & Clean Missing Data**.
- Achieved an **Outstanding** work-term rating from our lead technical mentor through effectively coordinating team efforts.

PROJECTS

3D PORTFOLIO WEBSITE — Blender, React-3-Fiber, Three.js, Framer-Motion, TailwindCSS

🔗 [My Web](#)

August 2023

- Designed 10+ 3D models in **Blender** and seamlessly integrated them into **Three.js** scenes using **React-3-Fiber's GLTF loader**.
- Ensured smooth scrolling transitions between the website's different sections using **GSAP** framework & **useScroll** function.
- Implemented multiple 2D & 3D scroll animations using the **Framer-Motion** animations library to enhance the UI/UX experience.

BANKING TRANSACTIONS ANALYSIS — SQL, SQL SMS, Power BI

🔗 [Repo Link](#)

June 2023

- Detected spending trends, category spikes, and irregularities in account transactions by implementing SQL query analysis, utilizing cursors, conditional expressions, and data type conversions.
- Optimized query performance by **20%** through the implementation of **explicit cursors**, enabling simultaneous traversal of multiple rows for efficient data retrieval, computation, and table updates.
- Presented insights and trends with a comprehensive Power BI dashboard, integrating multi-row cards and interactive charts.

LEADERSHIP INITIATIVES

Director of External Affairs

September - December 2023, May 2024 - August 2024

Double Degree Club

- Improved class's midterm-to-final average by 15% through effective organization of events, including an academic panel featuring Double Degree alumni speakers from EY, BCG, and Apple and a final exam review session, attracting 250+ attendees.
