EDUCATION

Bachelor of Computer Science and Business Administration Double Degree

Sept 2022 - Expected August 2027

University of Waterloo & Wilfrid Laurier University

- **Certification:** Microsoft Azure Artificial Intelligence Fundamentals

SKILLS

Languages

C++, C, Python, Ruby, SQL, JavaScript, HTML, CSS (Stylus, Tailwind), Java, Bash, Powershell

Libraries/Frameworks

Ruby on Rails, React Native, React, React-3-fiber, Three.js, Framer-Motion, Vue.js, Node.js, Next.js

Tools/Platforms

Git, Google Cloud Platform (GCP), Linux, AWS, Azure, Jenkins, Jira, Jamf - Apple MDM

EXPERIENCE

Software Engineer Intern (IT Engineering & Shop Minis Team)

January - April 2025

Shopify

Toronto, ON

- Shipped **Daily Fits** to millions of users — an application on the Shop App built with **React Native**, **Shop Minis SDK**, and **Ruby on Rails** — featuring image upload, AI-powered background removal, date-based outfit cataloging, and sharing.
- Built a **Python ETL** pipeline on **GCP (Pub/Sub → BigQuery)** to ingest and normalize daily telemetry from **10,000+ devices**, powering **Looker Studio** dashboards that quantify security control effectiveness and surface misconfigurations.
 - Eliminated **95%** of misconfigs by automating daily BigQuery analysis and Slack alerts via **Ruby**, **SQL**, and **GitHub Actions**.
- Reduced integration code by **30%** via migrating an internal **Rails** tool from a REST-based client to an in-house **GraphQL** client.

Software Developer (Vision One Endpoint Security Team)

January - April 2024

Trend Micro

Ottawa, ON

- Developed a caching mechanism for the **Application Control** product to enforce security rules on specified users using **C++**.
- Facilitated cross-team collaboration to detect and generate **8+** new security events on **Workload Security's** GUI using **Java**.
- Automated **Jenkins** regression tests across **16 OS** and integrated results as a required GitHub check to improve build stability.
- Enabled developers to automate build performance results by maintaining **Python** test scripts and deploying **AWS** resources.

Web Developer

July 2023 - July 2024

Vision Capital Corporation

Toronto, ON

- Reduced invalid private fund access by **80%** by building **Vue.js** pages to verify and enforce investor eligibility requirements.
- Integrated **Prismic API** to build **10+** reusable content blocks, enabling the marketing team to make code-free website updates.
- Enhanced policy transparency by implementing cookie policies for Vision Capital, an investment fund managing **\$600+ million**.
- Migrated production workloads from AWS to **Netlify**, reducing deployment complexity and pitching cost reduction to executives.

PROJECTS

3D PORTFOLIO WEBSITE — *Blender, React-3-Fiber, Three.js, Framer-Motion, TailwindCSS*

[🔗 My Website](#)

- Modeled and integrated **10+** custom 3D assets using **Blender** and **React Three Fiber** to render immersive **Three.js** scenes.
- Created a lifelike avatar that rotates in response to menu toggles using **Mixamo** animation library and **React Three Fiber**.
- Enhanced UI/UX with smooth 2D and 3D scroll-triggered transitions using **Framer Motion** and **GSAP** animation library.

BANKING TRANSACTIONS ANALYSIS — *SQL, SQL SMS, Power BI*

[🔗 Repo Link](#)

- Identified trends, anomalies, and category spikes in transaction data by writing advanced **SQL** with cursors, and conditional logic.
- Improved query performance by **20%** using explicit cursor for multi-row processing, complex computations, and fast table updates.
- Presented detailed financial insights via a **Power BI** dashboard, incorporating interactive charts & visuals of key transactions.

LEADERSHIP INITIATIVES

Director of External Affairs

September - December 2023, May 2024 - August 2024

Double Degree Club

- Improved class's midterm-to-final average by **15%** through effective organization of events, including an academic panel featuring Double Degree alumni speakers from EY, BCG, Palantir, Apple and a final exam review session, attracting **250+** attendees.
